

YASIR AYAD HAMED AL RAWEE

Full-Stack Engineer | Django · Next.js · LLM & RAG Systems

Summary

Computer Engineering graduate with hands-on experience in full-stack development (Django, Next.js) and AI system integration including LLM-based applications and RAG systems. Built production-grade web applications and AI-powered tools for academic and freelance clients, focusing on scalable and real-world solutions.

Education

Bachelor of Computer Engineering Kırıkkale University

September 2021 - June 2025 **GPA: 3.25 / 4.00**

Graduated 3rd in the department, awarded Honor Certificate.

Languages Arabic (Native) · Turkish (Fluent) · English (Intermediate)

Work Experience

Full-Stack Developer (Freelance & Personal Projects)

July 2025 - Present

Delivered full-stack web and AI integration solutions for international clients across multiple domains.

ASP.NET MVC Developer Kırıkkale University Information Processing Dept.

May 2025 – Jul 2025

Developed an enterprise-grade admin panel for managing customizable academic event websites using ASP.NET Core MVC and Entity Framework Core. The system is actively used for real-world academic event management.

Full-Stack Developer Kırıkkale University — Various Departments

Mar 2024 – Apr 2025

Developed bilingual (Turkish–English) websites for international academic events, including the International Family Studies Congress, the International History of Science Symposium, and the SBEOK Congress. Collaborated with multiple departments to deliver tailored solutions.

familycongress.kku.edu.tr · sbeok.kku.edu.tr · dafsem.kku.edu.tr

Full-Stack Developer (Freelance — Mostaqil Platform)

Aug 2023 – Oct 2023 • 🔗

Migrated a school management system from ASP.NET MVC to Laravel (PHP) for a new client, preserving all core functionalities while changing the tech stack.

Full-Stack Developer (Freelance — Mostaqil Platform)

Nov 2022 – May 2023 • 🔗

Built a school management system using C# ASP.NET MVC with multi-role access (admin and teacher), enabling schedule management, announcements, activity tracking, and a real-time classroom display system.

Internship

Backend Developer – Bayraktar Solar Enerji, Ankara - Turkey

Jul 2024 – Aug 2024 • 🔗

Developed a Flutter mobile application that remotely controls a Python Flask backend running on a laptop, enabling real-time code execution, file operations, and file transfer between mobile and desktop.

Full-Stack Developer – Kırıkkale University, Information Processing Dept.

July 2023 - August 2023 • 🔗

Developed a web-based management system using PHP for managing students, teachers, and projects.

Skills

Languages: Python · C# · TypeScript

Frameworks: Django · FastAPI ·

ASP.NET Core · Next.js · Flutter

AI & ML: LLM Fine-tuning · RAG · NLP

· LangChain · Prompt Engineering

Databases: PostgreSQL · MySQL ·

MSSQL · MongoDB · FAISS

Tools: Git · Docker · REST APIs ·

Vercel · Hugging Face

Projects

Tejreed — AI Creative Tools Platform | tejreed.vercel.app

Next.js · FastAPI · HTDemucs

Built a full-stack AI SaaS platform for audio processing, including a Music Remover tool using HTDemucs for vocal separation with end-to-end file processing and a credits-based user system.

Student Affairs ChatBot — AI University Assistant | Graduation Project

LLaMA · Fine-tuning · RAG · EDA ·

BeautifulSoup · Back-Translation

Developed an AI chatbot for university students using a fine-tuned LLaMA model with RAG, trained on domain-specific academic data collected via web scraping and augmentation techniques.

Chaotic Video Watermarking TÜBİTAK 2209-A

Steganography · Henon Chaotic ·

DWT · SVD · PSNR · SSIM · NC

Designed a video watermarking system for copyright protection using chaotic and transform-based methods, evaluated with standard robustness and quality metrics.

NoBadWords — Multilingual AI Content Moderation Platform |

nobadwords.vercel.app

XLM-RoBERTa · Django · React ·

PostgreSQL · Redis · TensorFlow

Built a SaaS platform for multilingual toxic content detection using fine-tuned XLM-RoBERTa with hybrid AI + rule-based filtering, including usage tracking and moderation system.
